HIKING TRAIL

EASIEST

Trails with mild gradients, banked turns, and a wide trail base. Riders may encounter obstacles and features, including, but not limited to, gravel, rocks, roots, berms, bridges, and terrain variations. It is recommended that riders are comfortable and confident riding a bike.

DIFFICULT

Trails are challenging with varying widths, steeper slopes, and a mix of obstacles and features. Trails contain features and obstacles, including, but not limited to, jumps, ramps, roots, rocks, drops, bridges, and variations in the terrain surface. Riders must be competent mountain bikers.

MOST DIFFICULT

Trails are very difficult, more narrow, and include long steep descents, loose trail surface, natural and hand/machine-constructed features and obstacles, including, but not limited to, jumps, ramps, roots, rocks, drops, bridges, and variations in the terrain surface. Riders must have advanced mountain bike handling skills.
